# Aishwar C. Nigam

Microsoft Certified Trainer | Data & Cloud Specialist (Microsoft Fabric, Power BI, Azure Synapse, Copilot, SQL Server) | Senior Corporate Trainer & Mentor  
 Jhansi, Uttar Pradesh, India

## Summary

I'm a Microsoft Certified Trainer (MCT) with 10+ years of turning complex tech into simple, unforgettable learning experiences. I specialize in Microsoft Data & AI — Power BI, Microsoft Fabric, Azure Synapse, SQL Server & Microsoft Copilot — where I break down concepts like lakehouse architecture, real-time analytics, secure prompt engineering, and SQL high availability into learning that sticks, scales, and delivers business outcomes. Over the years, I've delivered 200+ certification-aligned programs (DP-700, DP-600, DP-203, PL-300, DP-300) for 1,000+ professionals across the globe, enabling teams at Deloitte, TCS, BPCL, GSK, Agile Defence, and more. My sessions consistently achieve 98%+ learner satisfaction, with participants not just clearing certifications — but implementing what they learn. Today, at Koenig Solutions, I work as Senior Corporate Trainer & Trainer+, designing and delivering advanced content on Fabric Dataflows Gen2, Synapse Pipelines, Delta Lake, Power BI performance, and Enterprise Copilot adoption. Alongside training, I also mentor new trainers, building a culture of growth, skill, and teaching excellence. From training individuals → to creating more trainers — a journey I'm proud of. Before Koenig, I served as a Corporate Trainer at The Knowledge Academy, and earlier as a Full Stack Developer & Database Administrator at Incipit Consultancy Services, where I built scalable systems, optimized data pipelines, and developed predictive ML models. What I bring to the table: Microsoft Fabric & Power BI (DAX, modelling, governance) Synapse & ADF pipelines SQL Server tuning & HA/DR SSRS / Tableau visualizations AI enablement with Microsoft Copilot. What defines me is more than technology — it's mentorship, curriculum craftsmanship, and making learning feel real, relevant, and human. Outside work, you'll find me writing, sketching, travelling, and capturing stories through my lens — creativity fuels how I teach. If you believe in knowledge that

scales. technology that empowers. mentorship that multiplies — let's connect.

---

## Experience

Koenig Solutions Pvt. Ltd.

Senior Learning Specialist

July 2023 - Present (2 years 8 months)

- Conducted 200+ technical training sessions globally in Azure, SQL, and Power BI, upskilling over 1,000 professionals.
- Boosted client satisfaction by 15% through customized training paths aligned with business goals.
- Mentored a team of 10+ junior trainers, fostering best practices in training delivery.

The Knowledge Academy

Corporate Trainer

December 2021 - July 2023 (1 year 8 months)

- Designed training programs for SQL, Azure, and data analysis, training over 300 professionals globally.
- Improved engagement by 20% through collaborative curriculum design with industry experts.
- Delivered remote training via LMS platforms, maintaining high interactivity and satisfaction rates.

Bundelkhand University

Software Development Lead

June 2018 - December 2021 (3 years 7 months)

Jhansi, Uttar Pradesh, India

- Developed scalable web applications, increasing operational efficiency by 25% for clients.
- Built advanced data pipelines with Python and Azure, reducing processing times by 30%.
- Led a team of 5 developers, ensuring coding best practices and faster project turnaround.
