KD Pathak
Consultant & Corporate Trainer
multipletechlogics@gmail.com

Azure | Power Platform | PowerShell | SharePoint | MS-SQL | O365 | D365

Professional Summary

- **Over Ten years of Experience** with skill set of Training, Designing, Implementing Azure Cloud, SharePoint, MS-SQL Server, PowerShell scripting, O&D 365, Cloud deep drive course etc.
- An **excellent knowledge** of infrastructure automation it's specifications, security, implementation, documentation, and consultation
- **Application** and **Infrastructure Migration** in **on-premises** and to **Cloud**
- **Widespread command** on Windows PowerShell scripting along with tool making
- Managing several Azure infra, SharePoint, MS-SQL farms of various versions of several clients located across the world **[Private + Public Cloud]**
- **Hands on Expertise** in Azure, Power Platform, RPA: Robotic Process Automation, SharePoint Server Platform, MS-SQL Server, Windows Server Troubleshooting, AD: Active Directory, IIS: Internet Information Services, **Dynamics** and **integration** etc.
- **Automation Scripting exposure** via **Shell, playbooks, ARM template, Robotic Automation Tools** etc. with most of the **Microsoft's platforms** (Azure, O&D 365, SharePoint, MS-SQL, SCCM, SCOM, AD etc.), **DevOps** tools (Ansible, Jenkins, Docker, Git, Jira etc.) and third-party tools etc.
- **Multiple Certified Professional** in MS Platforms + Process (ITIL)
- Self-Motivated, diligence and ability to take on dynamic and challenging role

Training Delivery Organizations

TCS, Accenture	Cognizant, Wipro	Oman Airport
Reserve Bank of India	IBM, Kyndryl	Credit Suisse
American Embassy	Larsen and Toubro	Sony, CGI
UST Global	Caterpillar	Zensar, Deloitte
Microsoft Batches (ESI, GSI etc.)	Open Batches (US, UK, Australia etc.)	and more...

Certifications

- MCT - Microsoft Certified Trainer
- MS - Microsoft Specialist
- MCP - Microsoft Certified Professional
- MCTS - Microsoft Certified Technology Specialist
- Azure Solutions Architect Expert

Training Competencies

Windows PowerShell	Microsoft Windows	MS-SQL Database
		[Cloud, On-Premises, Hybrid etc.]
Microsoft SharePoint [Cloud, On-Premises, Hybrid etc.]	Power Platform [Power Apps, BI, Automate etc.]	O & D 365 Suite, Security
[Azure Security, Azure Storage, Azure Datawarehouse, Azure analytics, Azure Integration, Azure Streaming, Azure Databricks, Azure Data Factory (ADF),	**Microsoft Azure Platform** Azure Event Hub, Azure Notification, Azure Monitoring, Azure Data visualization, Azure Synapse Analytics	Azure Database, Azure IoT, Azure HPC Azure Machine learning (ML), Azure Artificial Intelligence (AI), Azure DevOps, etc.]

Industrial Experience

- Established **techniques** and **strategies** for business outcome along with handling of **multiple projects** with effective team communication even sometime individual contributor

- **Master in Automation Scripts** using PowerShell, STSADM, Quest AD, and impressive experience on **Image Recognition Based Automation** tools like SikuliX and more (Designed audio recognition robot like Alexa as value ad-on for client via scripting)

- **Define Azure and Hybrid solution** using virtual networks, security center and DevOps to implement client solution with **Azure Stack**

- Hands on with multiple DevOps tools like **Docker**, **Ansible**, Jenkins, **Kubernetes**, Jira, Git for developing and maintaining several CI/CD pipelines through **Agile** methodology

- **Configuration, Implementation, Maintenance** of **several applications and infrastructure** along with multi node Clusters, Active Directory, DNS etc.

- **Migration, Capacity, Disaster Recovery** and **High Availability planning, implementation** for applications and infrastructure not only **on-premises** but also in **Azure**

- Hands-on with multiple assignments of Power platform such as **Power Apps, Power Automate, Power BI** along with **Dynamics** and **SPFx** etc.

- Extensive knowledge and hands-on experience in **installing, configuring, upgrading,** and **managing cloud, application, server infrastructure, Databases etc.**

- **Programming experience** in .NET, SQL querying, SharePoint Designer, Visual Studio, Metalogix Replicator, BizTalk Server, Internet Information Services (IIS) etc.

- **Data** and **requirement analyst, analyze** and **address** various **security threats** and **risk** with respect to best practices suggested by product company in addition with client expectations

- **Troubleshooting** experience in not only **infrastructure** and **configuration** but also **functional working** of installed custom and default solutions

- **24*7** work practice and **Open to learn** along with **let's do it mindset**

- Worked in multinational companies like **TCS** and **Accenture**

"I love and pride myself on my abilities to explain and guide in complex scenarios with easy-to-serve terms for all with commitment and trust"
